

School Operations

When CCA resumes school in school buildings, school operations will be designed to deliver excellent instruction to students. There will be, of course, operational adjustments to mitigate concerns related to COVID-19. These are examples of the operational adjustments in the area of School Operations.

Beginning of the school day,

- staff and students will undergo a daily health screen including a temperature check

During the school day,

- students will not be able to congregate in communal spaces (cafeterias, playgrounds, gym, hallways, etc.)
- students will not be able to share materials, equipment, learning aids, etc. unless they have been thoroughly cleaned and sanitized.
- to the extent possible, transitions between rooms will be limited.
