

CCA Guidance Services

Covenant Christian Academy

Intervention Program

Any student who scores below average on the STAR Renaissance Assessment in Math and Reading will be sent to the intervention program.

Referral Program

A process is in place for parents and teachers to refer students for full individual evaluation to the school district. Parents must give full consent before referring students to receive the evaluation.

Instructional School Plan (ISP)

An ISP is a list of accommodations based on the recommendations from the full individual evaluation. These accommodations are discussed with teachers and parents and parents have to sign the document before accommodations are implemented in the classroom.

Social/Emotional-Behavior Intervention Plan

This plan is new this school year and available to students with behavioral issues that pertain to social emotional development. CCA staff and parents will be able to work together that will help the student deal with emotional triggers through behavior awareness, proactive intervention, educative intervention, and functional interventions.

High School Guidance

SCOIR (online platform for students and parents) offers an on-boarding library, a college readiness curriculum, a student checklist, and many other resources to help students with guidance on High School classes and college readiness. The platform will also help students with college applications during their junior and senior year. Our partnership with South Texas College (STC) will also offer our students with guidance services as they determine their career path after High School.
